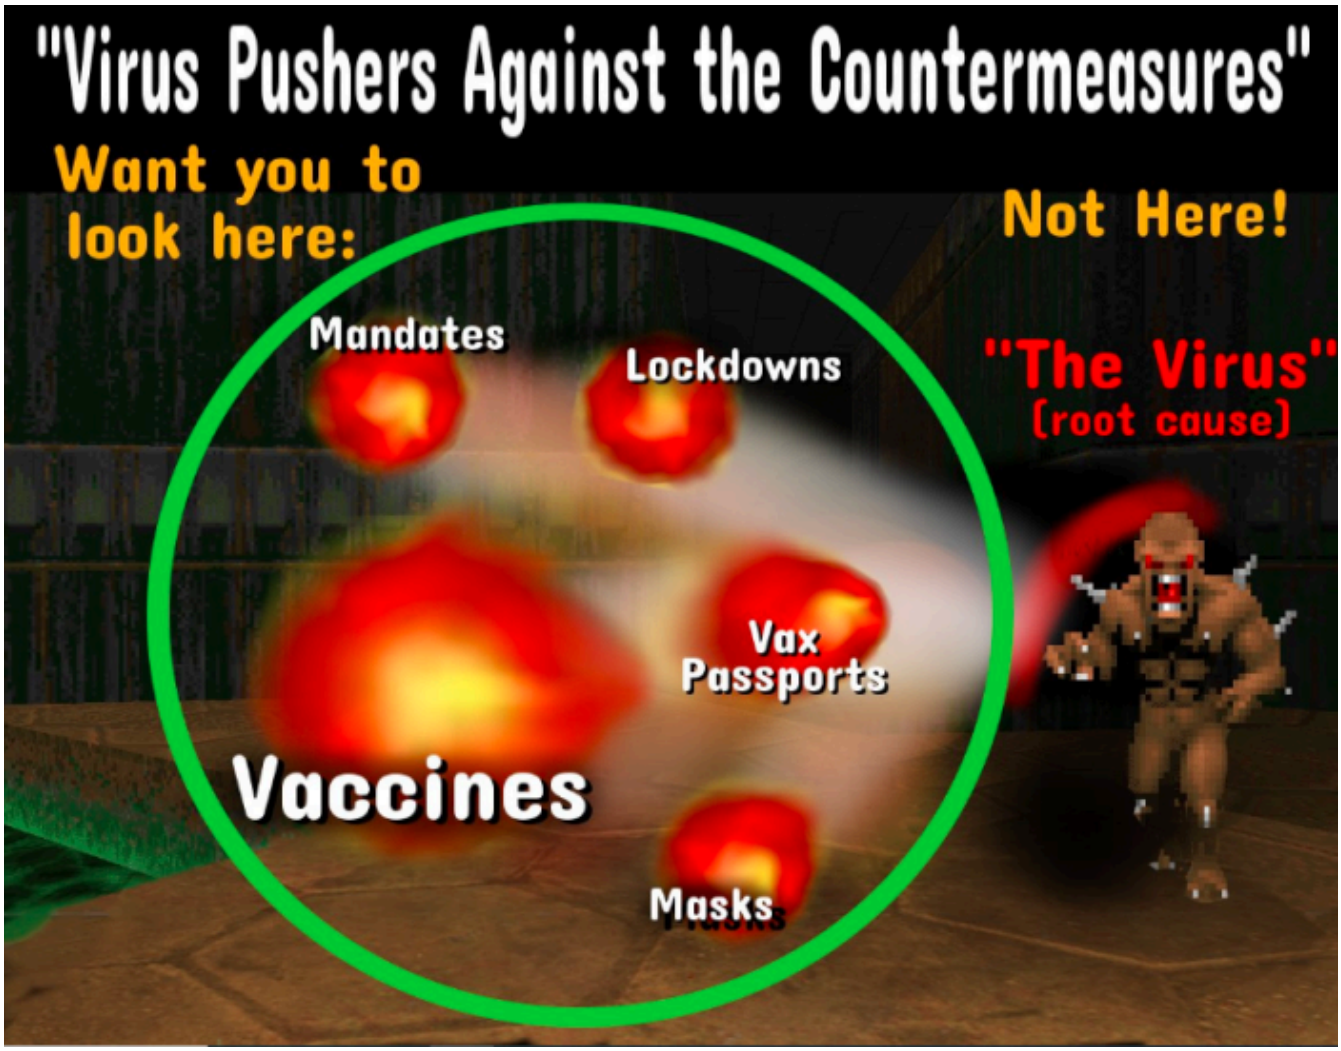
Reporting That You're Not Getting Elsewhere (Do Your Own Research To Verify)

JUNE 5, 2022 BY RONNIE

Taking That Last Step To See Through The Lies….



The stages of COVID awareness

1. VIRUS: Yes!
    a. There is a deadly virus, Pandemic
    b. There is a virus, but it is only mild.

    RELATED:

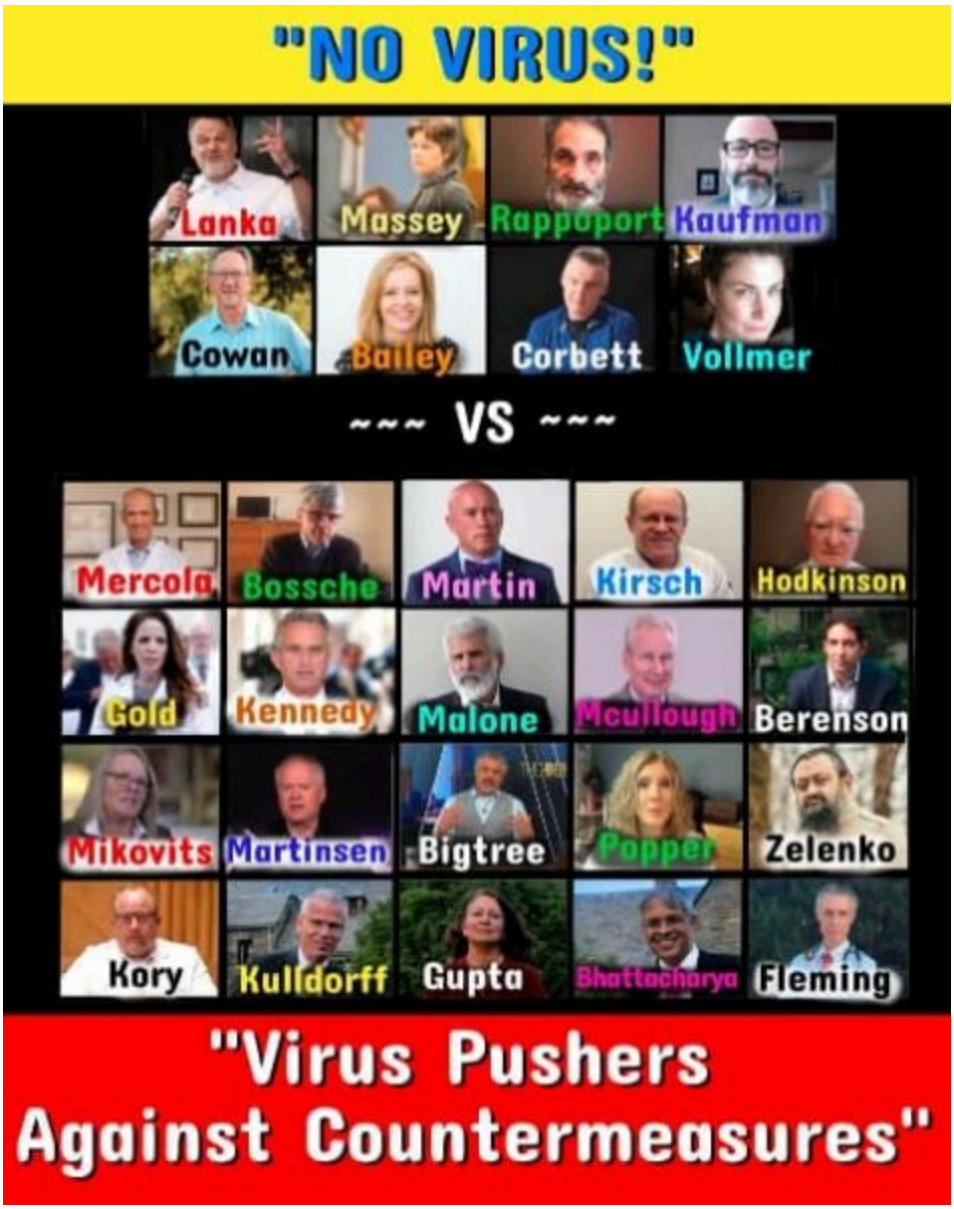
    - Lab Leak / Bioweapon vs zoonotic origin
    - COVID vaccines indicated for certain populations
    - "Early Treatment" (with anti-parasitics/insecticide HCQ/Ivermectin) is helpful
    - Vaccines during pandemic creates Super Strains
    - Variants: Original, SARS-COV-2, Delta, Omicron, etc.
    - Natural Immunity
    - MUST ACCEPT validity of PCR, genomic sequencing, other tests

2. VIRUS: no!
    a. 👉 There is no SARS-CoV-2 👈
    b. All of virology is bunk
    c. All of germ theory is bunk

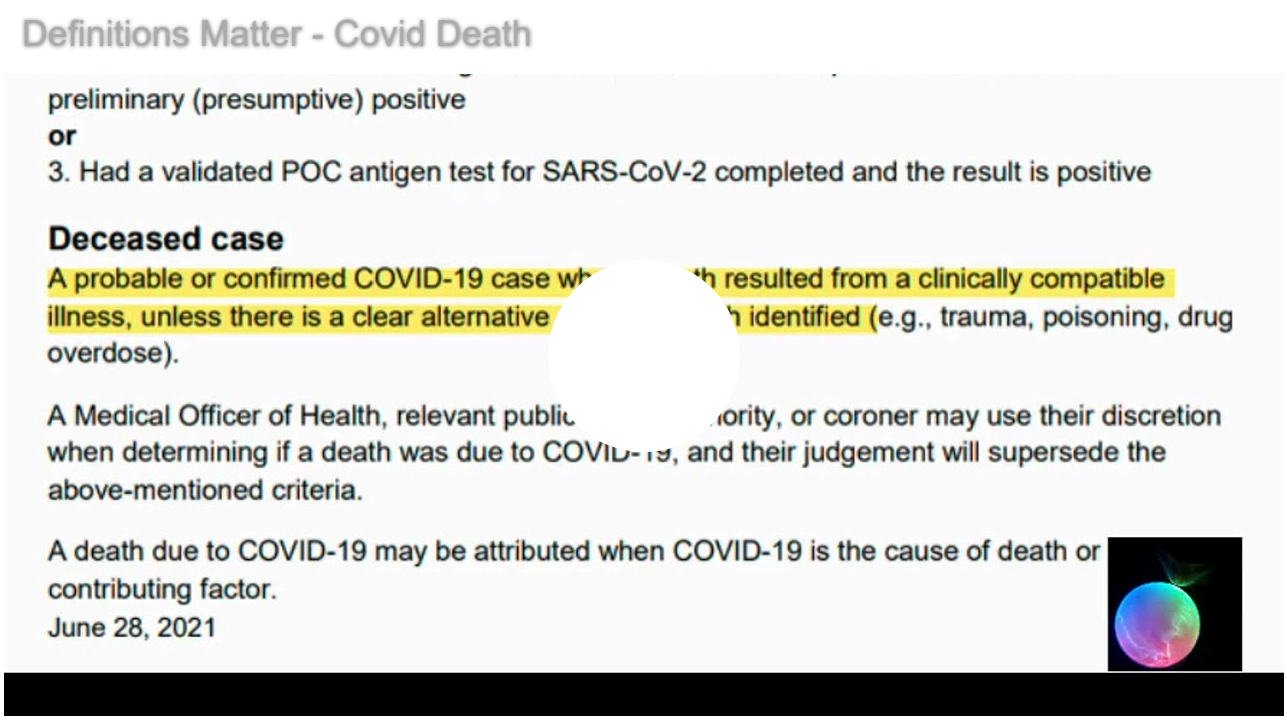
- Pandemic+Virus were Real & Deadly!
  Countermeasures were appropriate
  NO CRIME

- Virus was Real, but pandemic was mild.
  Countermeasures were too extreme
  Crime was ….???

- The whole GD thing was a PSYOP.



Credit for the artwork goes to Bill Huston, and please visit his website. Also, this confrontation with Andrew Kaufman and Judy Mikovits is very much worth the watch. The full livestream is available online and mirrored for anyone wanting it.



Definitions Matter - Covid Death
preliminary (presumptive) positive
or
3. Had a validated POC antigen test for SARS-CoV-2 completed and the result is positive
Deceased case
A probable or confirmed COVID-19 case wh h resulted from a clinically compatible illness, unless there is a clear alternative identified (e.g., trauma, poisoning, drug overdose).
A Medical Officer of Health, relevant publi ority, or coroner may use their discretion when determining if a death was due to COVID-19, and their judgement will supersede the above-mentioned criteria.
A death due to COVID-19 may be attributed when COVID-19 is the cause of death or contributing factor.
June 28, 2021

Plenty of decent people across the world are fully aware that their freedoms have been crushed in a planned and deliberate manner since 2020. They see that these “conspiracy theories” of using a so-called pandemic to implement societal control turned out to be accurate. Kudos to them for that.

But, there’s one step many won’t take: admit there’s no virus.

Why does this last step matter? Because it’s the pipeline to realizing how deep the pharma rabbit hole goes. If there’s no “Covid-19”, then it means all of the testing equipment is completely faulty and invalid. Moreover, all of the other “viruses” discovered over the years would be immediately suspect. If no viruses have ever been proven to exist, then virology — and germ theory itself — come crashing down. In order to preserve the medical industry, then this lie needs to be protected at all costs.

Why are theories of lab leak and/or bioweapon promoted? Because they attempt to explain the origins of this “virus”, rather than look into whether it’s even real.

How is a “case” defined, according to the World Health Organization? (See archive).

Notwithstanding how vague “suspected” and “probable” cases are, the definitions for so-called confirmed cases are equally dubious.

1. A person with a positive Nucleic Acid Amplification Test (NAAT)
2. A person with a positive SARS-CoV-2 Antigen-RDT AND meeting either the probable case definition or suspect criteria A OR B
3. An asymptomatic person with a positive SARS-CoV-2 Antigen-RDT who is a contact of a probable or confirmed case.

NAAT testing doesn't prove anything, which will be addressed later. Also, everyone, including the WHO, admits these tests aren't reliable.

Not only is there the issue of no isolation, WHO recommends in its March 2020 (see page 3), and September 2020 (see page 8), guidance NOT to isolate for routine testing.

Perhaps WHO just doesn't want proper testing done normally to save money?! Well, not really, their own paperwork (see archive) indicates that they view testing for just a gene to be sufficient.

If no virus has even been isolated or shown to exist, then what have doctors been prescribing over the years? Are they morons, or just being paid off?

Admittedly, it wasn't really a topic addressed here for quite a while. However, the time has long come for hitting this home. And what is the definition of a "Covid death"? According to the World Health Organization, it is:

World Health Organization

INTERNATIONAL GUIDELINES FOR CERTIFICATION AND CLASSIFICATION (CODING) OF COVID-19 AS CAUSE OF DEATH

2. DEFINITION FOR DEATHS DUE TO COVID-19

A death due to COVID-19 is defined for surveillance purposes as a ***death resulting from a clinically compatible illness, in a probable or confirmed COVID-19 case, unless there is a clear alternative cause of death that cannot be related to COVID disease (e.g. trauma)***. There should be no period of complete recovery from COVID-19 between illness and death.

.

A death due to COVID-19 may not be attributed to another disease (e.g. cancer) and should be counted independently of preexisting conditions that are suspected of triggering a severe course of COVID-19.

Unfortunately, this isn't satire. The WHO actually provides this incredibly vague and meaningless definition. Only a complicit and deliberately obtuse media wouldn't expose this. (See archive), as the original has either been deleted or moved.

The BC Centre for Disease Control (BCCDC), admitted in April 2020 that these tests can't actually determine active infection. (See original). Also, the 30% error rate is apparently just a commonly quoted statistic, not the result of real research.

There was an article in June 2020 (now deleted), where BCPHO Bonnie Henry warned against mass testing, as false positives could overburden hospitals. See archives here and

here.

To repeat: considering that there is no virus isolation, and these tests aren't designed for infection anyway, what exactly is being tested for?

- Why is this virus pushed, despite lack of proof it exists?
- Why have *other* viruses been pushed, despite lack of proof they exist?
- Why does WHO recommend *against* isolation in regular testing?
- Why does WHO see testing for a gene as sufficient?
- Why is the definition of "Covid death" so convoluted?
- Why does Bonnie Henry admit false positives could flood hospitals?
- Why does the BCCDC admit these tests can't determine infection?

These are just a few of the core problems.

There's also all kinds of proof that this was planned in advance. And people should wonder about connections like the Rockefeller Foundation to the University of Toronto.

Of course, this isn't to say that everyone who still believes in germ theory or viruses is a grifter or shill. Plenty of well meaning people are still caught up in that. They RIGHTLY recognize martial law being imposed, but can't bring themselves to admit that it's all been a lie.

Many accept that 90-95% of this is a lie, but can't come to that last part.

That being said, there are still some basic questions that need answering.

Simply saying: "I oppose masks, vaccine passports and lockdowns" is a safe position to take. It doesn't address the depth of the hoax.

And if you haven't checked out the work from Fluoride Free Peel, go do that. This deadly "virus" hasn't been isolated or proven to exist, anywhere in the world. Additionally, it doesn't appear that any others have been either. There's also a pretty interesting set of Google docs available from A Warrior Calls, worth checking out.

Many thanks for your post. The no virus vs virus pushers is a useful poster. I was aware of most of the virus pushers. I have tried to point out the fundamental flaws in virology theory to Steve Kirsch for example. So many people are taken in.

I managed to turn my thinking round from vaguely thinking that viruses existed as we were told to realising we had been scammed for many decades.
